All **named features** and **unnamed features** plotted on the Base Map Layer 9 in Appendix 1 are listed below. There is one exception F10-1 to F10-11; given the problems with plotting private tracts in Kettenpom and Hoaglin Valleys (see respective entries), these tracts are found on the Base Map in layer 8.

The location for most of the named features and points of interest can be found in the *People and Places of the NFERW* document in the directory of the same name. The location of the files for the unnamed features and points of interest are indicated below for each respective listing and can be found in the *Unnamed Features and Points of Interest file/Directory* under the same file name.
