

IA12

Robert Hoaglin Indian Allotment

IA12 Map 2: T4S, R7E, S 24 and 25

There was no documentation related to this tract available for review. There may be documentation in the SRNF HF homestead files.

This tract is plotted on the Base Map with a dashed line to indicate that the status of this tract as an IA has not been confirmed. The reason for this conclusion is that Hoaglin was classified as "1/2" Indian on the 1880 Blocksburg census (1880-2). The Hoaglin family was among the earliest to settle on Long Ridge. See also the Robert and George Hoaglin entry. See also B08, IF04, IA09 for more information on the Hoaglin family.

This tract was still owned by descendants of the Hoaglin family in the 1990s and may still be owned by them.
